
wdncrunch Documentation

Release 0.1.0a0

Wout De Nolf

Aug 29, 2018

Contents

1	Tutorials	3
1.1	Examples	3
2	API Reference	5
2.1	Module contents	5
3	Change Log	7
3.1	develop (unreleased)	7
3.2	genesis (unreleased)	7
4	Indices	9
	Python Module Index	11

The wdncrunch package provides a template for a python project with CI and documentation.

1.1 Examples

```
In [2]: from wdncrunch.modulea.classa import classa
        help(classa.func)
```

Help on function func in module wdncrunch.modulea.classa:

```
func(self, x)
    Function description

    Args:
        x (num): a number

    Returns:
        num: same as input
```

Modules

<code>wdncrunch.modulea</code>	This package provides <code>classa</code>
<code>wdncrunch.moduleb</code>	This package provides <code>classb</code>

2.1 Module contents

This package provides `classa` and `classb`

3.1 develop (unreleased)

- Create first project template
- Travis CI (Linux, Python 2+3, Docs)
- Appveyor CI (Windows, Python 2+3, Docs)
- ReadTheDocs (Phinx Docs + notebooks)

3.2 genesis (unreleased)

- Empty project

Tutorials Some examples on how to use the library

API Reference API documentation of the packages included in *wdncrunch*
